EDUCATION

Shri Govindram Seksariya Institute of Technology and Science

BTech Information Technology

Indore

November 2022 - Present

Relevant Coursework

- Object-Oriented Programming
- Discrete Structures
- Advanced Engineering Maths
- Database Management System

PROJECTS

CodeVault: AI-Powered Code Management Platform

August 2025

[Github link for Project](#)

- Created **CodeVault**, an AI-powered **code management platform** using the **MERN stack**, enabling users to generate code, save code snippets, and retrieve solutions for any programming problem in multiple languages.
- Built a feature to generate **random coding problems** with hints and solutions, allowing users to practice and explore different topics efficiently.
- Implemented a personalized **interview preparation module** where users can select domains or roles, attempt mock interviews, receive scores, and get feedback on strengths and areas to improve.
- Designed a responsive **React.js frontend** with **Tailwind CSS** and REST APIs on **Node.js**, ensuring smooth interaction and seamless database integration with MongoDB.

Skills: MERN Stack (MongoDB, Express.js, React.js, Node.js), LangChain, AI Agents, Piper-TTS, Tailwind CSS

Chatzz: Chat Application with Inbuilt Chat Agent

March 2024 - April 2024

[Github Link](#)

- Built a real-time chat application using **React** for frontend and **Firebase** for authentication and message storage, demonstrating full-stack development skills.
- Implemented an inbuilt chat agent using **Python** and **LangChain** to respond to user queries, enhancing user engagement and interactivity.
- Implemented prompt engineering techniques for the chat agent to provide context-aware and accurate responses.

Skills: Python, React, JavaScript, LangChain, Firebase, Prompt Engineering

WhatsApp Chat Analyzer

May 2025

[Github Link](#)

- Developed a Python tool to analyze WhatsApp chats. Efficiently processed data from both group and individual conversations.
- Created visualizations and insights on active users, message counts, frequently used words, emojis, and chat patterns to understand user behavior.
- Applied **data cleaning**, **regular expressions**, and **text analysis** techniques to extract actionable statistics and trends.

Skills: Python, Data Cleaning, Regular Expressions, Data Visualization, Text Analysis

IPL Player Analyzer

May 2025

[Github Link](#)

- Built a Python tool to analyze and visualize IPL player statistics (2008–2024), including runs, wickets, strike rate, averages, and performance trends across seasons.
- Built an interactive **Streamlit** frontend allowing users to explore individual player stats, compare multiple players, and visualize trends through charts, graphs, and heatmaps.
- Processed and cleaned datasets using **pandas**, applying statistical and data analysis techniques to provide accurate, actionable insights for player performance evaluation.
- Implemented features to rank players based on customizable metrics, enabling dynamic comparison and deeper analysis of team and player performance over time.

Skills: Python, Data Analysis, Data Visualization, Streamlit, Pandas

\$-Tracker: Personal Expense Tracker

July 2025

[Github Link](#)

- Developed a personal expense tracker web application using **Django** and **SQLite**, enabling users to log, categorize, and track expenses with detailed descriptions and dates.

- Implemented secure user authentication and session management to ensure data privacy and personalized user experience.
- Designed intuitive and responsive user interfaces for adding, viewing, editing, and managing expenses, improving usability and accessibility.
- Utilized Django’s ORM to efficiently handle data and implemented full **CRUD operations** for robust expense management.
- Added features for generating summaries and insights on spending patterns, helping users make informed financial decisions. *Skills: Python, Django, SQLite, Web Development, User Authentication, CRUD Operations*

POSITION OF RESPONSIBILITY

GS Production House Club <i>Graphic Designer</i>	SGSITS Indore March 2023 - June 2025
CodeFoster <i>Core Team Member</i>	SGSITS Indore May 2024 - June 2025
IPSC IT Fest <i>School Team Head</i>	Sainik School Rewa August 2017

SKILLS

Programming Languages:	Python, C, C++, Java, JavaScript
Platforms / Version Control:	Git, GitHub (with GitHub Actions)
Database Management:	MySQL, PostgreSQL, MongoDB
Web Development:	HTML, CSS (Bootstrap, Tailwind), JavaScript, React JS
Backend Frameworks / Libraries:	Flask, Django, FastAPI
Machine Learning / Data Science:	TensorFlow, PyTorch, PyTorch Geometric, Scikit-learn, NumPy, Pandas, OpenCV, LangChain
Soft Skills:	Leadership, Communication, Organization
Languages:	English

ACHIEVEMENTS

CodeQuest: Coding Competition - 2024 <i>Certificate</i> ↗	3rd Rank
Solved competitive coding challenges in timed contests hosted by CodeFoster, SGSITS Indore using C++ and Data Structures & Algorithms. <i>Skills: C/C++, Data Structures, Algorithms, Problem Solving</i>	Feb 2024
KAKUSHIN 9.0	-
Participated in KAKUSHIN 9.0 Hackathon organized by Nomura; presented an innovative beach cleanup solution after qualifying through the executive summary round. <i>Skills: React JS, Node JS, Machine Learning, Deep Learning</i>	July 2024

CERTIFICATES

CS50’s Introduction to Programming with Python (Course Link ↗)	April 2023 - June 2023
The Web Developer Bootcamp by Colt Steele (Course Link ↗)	September 2023 - January 2024
Machine Learning A-Z in Python Course Link ↗	February 2025 - June 2025
